HEX PATTERN REINFORCEMENT

FARM TO FEET

200 Needle: The needle count refers to the number of needles on the inside of the knitting machine's cylinder. The higher the needle count produces a tighter knit structure, and requires a very premium fine merino yarn.

Trail socks made with 19.5 Micron US wool: Any wool that is less than 24-micron is considered merino. The finer the micron the more premium the yarn is. It has more crimps per inch for better long term performance & durability, is softer and provides more itch-free comfort.

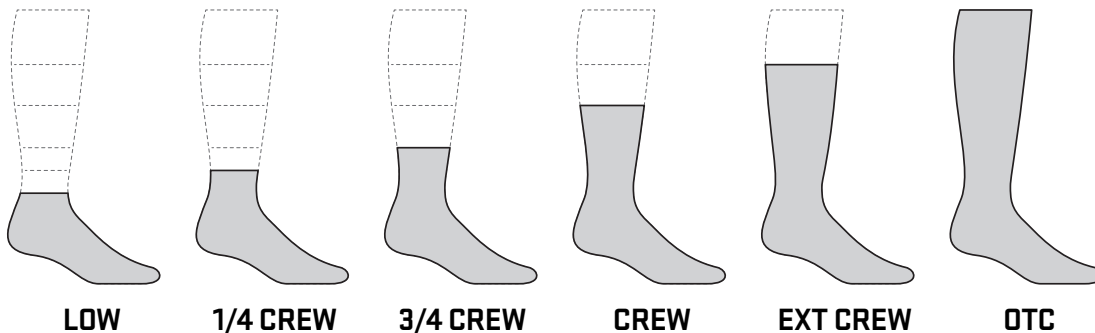

100% AMERICAN

While many sock brands are "Made in USA of imported yarn", Farm to Feet is 100% American - made from 100% domestic yarn and manufacturing. We can proudly state "MADE IN USA".

Cushioning where you need it, without the bulk where you don't. By using targeted cushioning zones, we protect your feet on impact.

SOCK HEIGHTS

FALL/WINTER 2024 TERMS

MISSION

Celebrating the American manufacturing tradition, Farm to Feet creates the world's best socks for everyone to follow their own trail.

VISION

Farm to Feet manufactures the world's best American-made socks, improves the outdoor recreation experience, and advocates for the protection of wild places.
